Profile

I am a passionate and dedicated software developer with a strong background in Computer Science and Engineering from Independent University, Bangladesh, with a minor in Marketing. I have hands-on experience in mobile and web development, particularly using Flutter, Firebase, HTML, CSS, and JavaScript to build responsive and user-friendly applications.

My portfolio includes various projects, such as the Shodai eCommerce app, a location-based grocery delivery service, the LIBRARYBD online bookstore, a waste management web application, a task management app, and the MeArm V1.0 robotic arm project. These projects demonstrate my diverse skill set in software development and problem-solving.

I am eager to gain more professional experience, contribute to innovative projects, and grow as a developer. In addition to my technical expertise, I have been recognized for my achievements in competitions like the Intra TechFest and the AdVerse advertising competition.

Professional Experience

Monico Technologies Ltd, *Flutter Developer (Intern)*   Jun 2024 – Sep 2024
- Front-end design of their existing project
- Collaborating with the project manager
- Update daily task report

Education

B. Sc. In Computer Science & Engineering, *Independent University Bangladesh*   2024
Minor - Marketing

A-Level, *Siddiqui's International School*   2018

O-Level, *Dhanmondi Tutorial*   2016

Projects

Shodai - ECommerce Application
"Shodai" is a location-based grocery service. It's a platform where you can buy vegetables and groceries through an Android app built using Flutter and Firebase. Based on pre-order you can confirm your daily grocery needs. Shodai is a product of Monico Technologies Ltd. 🔗

LIBRARYBD
LIBRARYBD is an online bookstore web application that uses HTML, CSS, and JavaScript. 🔗

MeArm V1.0 Robotic Arm using Arduino
MeArm is a pocket-size robot arm. It was conceived to make robotics, electronics, and programming accessible - by driving down the cost of robot arm ownership.

Waste Management System
A DBMS project of Independent University, Bangladesh using MySQL. A web application aimed to provide a digital way of complaining about the waste problem encountered every day. 🔗

Todo App
A Task Management Mobile Application using Flutter and Firebase. 🔗

WeatherNow
A weather-showing site using Open Weather Map's 5-day weather forecast data using CSS and JavaScript. 🔗
